## Project Title: Friends Website

I'm aiming to build a multi-page website, jumped around with a use of navigation bar either on top or on the side. Each page will have specific theme of content. Design would be mainly focused on easy navigation, user experience, simple but attractive color & font choices, and its consistency.

- **Main page & Introduction**
  - Few pictures representing Friends
  - Short intro - an American sitcom television series...
- **About**
  - producers, no. of seasons, no. of episodes
  - Quick summary
  - Production company
  - ...
- **Cast and Characters**
  - Picture of each character
  - Actors for each character
  - Their personalities
  - Fun facts
- **Favorite episodes picked by audiences**
  - Image of some episodes along with short summary
- **Friends gallery**
  - Images from friends and short note in an image gallery format
- **Related sources**
  - List of sources, including the Wikipedia page
